

TikiWiki Socialization

sixjumps

Author: Javier
Reyes

Steps for TikiWiki Socialization

- ✓ **Workspaces new version**
- ✓ **Social Platforms**
- ✓ **integration**
- Social Applications**
- container**

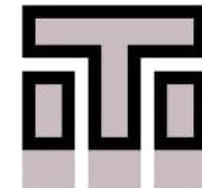

Tiki Workspaces

- ✓ Solve performance problems
- ✓ Tiki 2 integration
- ✓ Redesign for social platforms integration
 - ✓ Modules as social application containers (Opensocial & Facebook)
- ✓ Installation scripts and manuals for:
 - ✓ Learning communities
 - ✓ Enterprise communities and CRM
 - ✓ General content management, based on wiki pages and blog

Social Platforms integration

- ✓ User sig-in with your existing social platform account
- ✓ Password and authentication process delegated to the social platform
- ✓ No Tiki registration, get profile data from the social platform
- ✓ Social platform friends (contacts) invitation
- ✓ User activity publication to the social platform (user lifestream on the social platform)

Facebook Connect Integration I

login and registration

The screenshot shows a TikiWiki homepage with a sidebar containing links like Home, Wiki, Articles, and Blogs. A message at the top says "Thank you for installing Tikiwiki!" and provides instructions for configuration. In the center, there's a "Congratulations" message and a "Connect with Facebook" dialog box. The dialog box contains instructions to connect with Facebook, fields for email and password, and a note about accepting the Facebook terms of service. To the right of the dialog is a standard TikiWiki login form. Red arrows point from the text "Click to Facebook login" to the "facebook" button in the dialog and from "Facebook login form" to the login form itself.

Facebook Connect Integration II

friends invitation

The screenshot shows a MyTiki web interface with a Facebook Connect integration for inviting friends. A modal dialog box titled "Congratulations" is open, prompting the user to "Invite your friends to use Connect." It displays a grid of 20 user profiles from a Facebook network, with columns for "View All", "Selected (0)", and "Unselected". The "Selected" column has a blue checkmark icon. At the bottom of the grid are buttons for "Send Xfbml Invitation", "Skip", and "Report Forced Invites". To the right of the modal is a sidebar titled "Login" showing the user is logged in as "jreyes Javier Reyes". It also features a "Logout" button, a "Invite your friends" link, and a "Since your last visit" section showing "Aug. 31, 2008" and "wiki pages changed: 1. HomePage". Red arrows point from the text labels to specific elements: one arrow points to the "Logout" button with the text "Facebook profile photo", another points to the "Invite your friends" link with the text "Facebook friends invitation", and a third points to the "Selected" column in the grid with the text "Facebook friends selection panel".

publish activity to facebook feed

A screenshot of a TikiWiki homepage. At the top, there's a banner that says "Congratulations" with the message: "This is the default HomePage for your Tiki. If you are seeing this page, your installation was successful." Below this, there's a link to "wiki syntax" and a note about changing the page after logging in. A large blue arrow points from the bottom left towards a modal window titled "Publish this story to your Facebook profile?". The modal shows a preview of the post: "Javier ha enviado un comentario a Sociable! 4:44pm". It has two buttons: "Publish" and "No, Thanks". Below the modal, there's a section titled "Need help?" with links to learn more about TikiWiki, get help, and join the community.

Facebook publish story panel

A screenshot of a Facebook profile page for "Javier Reyes". The profile picture is a man holding a baby. The status bar at the top says "Welcome to the new Facebook". The main area shows a post from Javier Reyes: "Mozilla Ubiquity : http://www.sociable.es/2008/08/27/mozilla-ubi-quity-interfaz-comandos-web/, on Wednesday clear". Below the post, there's a status update input field with the placeholder "What are you doing right now?". The timeline shows other posts from August 29 and 27, including a bookmark and a friend request from Sergio Pérez Salz. On the right side, there's a sidebar with "Friends" and "See All" sections, and a logo for "mozilla labs ubiquity".

TikiWiki as a OpenSocial Application

The screenshot shows a MySpace profile page for a user named 'Javier'. At the top, there's a banner for 'MySpace.com España' with a status message: 'Estado: Javier : en tu red ampliada. Ánimo: neutro 😊 (Actualizar)'. Below the banner is a navigation bar with links for 'Inicio', 'Correo ▾', 'Perfil ▾', 'Amigos ▾', 'Música', 'MySpaceTV', 'Más ▾', 'Mi cuenta', and 'Cerrar sesión'. A search bar and a 'Powered by Google' logo are also present.

The main content area displays a TikiWiki application. The left sidebar contains a 'Menu' with sections for 'Home', 'Search', 'Stats', 'MyTiki' (with links to 'MyTiki home', 'Preferences', 'Messages', 'Modules', and 'User menu'), 'Wiki' (with links to 'Wiki Home', 'Last Changes', 'List pages', 'Orphan pages', and 'Structures'), 'Articles' (with links to 'Articles home', 'List articles', 'Submit article', 'View submissions', 'New article', 'Admin topics', and 'Admin types'), and 'Blogs' (with links to 'sezday nimbA', 'sezday of web', 'sezday sezdA', and 'sezday').

The right panel shows a 'Congratulations' message: "This is the default HomePage for your Tiki. If you are seeing this page, your installation was successful." It includes a link to 'wiki syntax' for editing details. Below this, a 'Get started.' section lists two steps: "1. Enable specific Tiki features." and "2. Configure the features." A 'Need help?' section provides links to 'Learn more about TikiWiki', 'Get help', 'official documentation', and 'support forums'. At the bottom, there's a 'Send feed' button and a note: "S'abre una nova pàgina d'informació de l'aplicació Tiki a la teva xarxa social." The entire application is styled with a blue and white color scheme.

a Tiki Site.

The screenshot shows a TikiWiki-based web interface with a "davver" theme. On the left, there's a sidebar with links like "Contactar", "Video Tutoriales", "Nuevo", "Artículos", and "Reproductores". The main content area features a "Last.fm Music" module. A yellow banner at the top of the module says "You've just added Last.fm Music. Customise your profile settings now or check out your friends' music taste." Below this, there are tabs for "Friends' Music" (which is selected) and "Music you might like". A search bar allows users to "Start typing a friend's name" and a "Compare" button. A "Sort by musical compatibility" button is also present. Below these controls, a grid of small album covers represents different artists. A specific track from Pere is highlighted with a play button and the text "Play Pere's favorite music". Below this, it says "Last track played: Explosions in the Sky" and "Total tracks played: 5,052 | Last.fm profile". To the right of the main content, there's a "Login" panel showing the user is logged in as "admin". It includes fields for "user:" and "set", a "Logout" link, and a "Menu" link. Below the login, there's a "My Workspaces" section showing "Current workspace: aaa" and "My workspaces: Workspace test, aaa". At the bottom, there's an "AulaWiki Assistant" section with a "Welcome to AulaWiki! First configuration steps:" list:

1. Assign workspaces_my module to the users that you want to use AulaWiki workspaces.
2. Change theme to workspaces.css.
3. Define the workspace roles and permission levels.
4. Define the workspace types, use MenuID 100 or define your own menu. Assign default resources and desktop modules.
5. Create a workspace of the previously defined
