

Cvs17

The branch **release_eta_carinea_rc1** (so badly named 😞) is now the CVS branch for 1.7.x. **Note that the 1.7.x branch is strictly for bugfixes.** All new features and changes must be committed to CVS HEAD and not the **release_eta_carinea_rc1** branch. Fixes committed to the 1.7.x branch will be merged into HEAD.

Below are instructions for development on the 1.7.x branch. You can find the release process page here: [ReleaseProcess173](#).

Checking out latest 1.7.x code

```
cvs co -r release_eta_carinea_rc1 tiki
```

This will place the latest 1.7.x code in a directory named "tiki".

Updating to latest 1.7.x code

```
cd tiki
```

```
cvs -q update -d -r release_eta_carinea_rc1
```

Beware of conflicts. It may be easier to simply checkout a fresh copy of the code

Committing bugfixes

```
cd tiki
```

```
cvs ci
```

There is no need to specify the branch if you checked out using the instructions above

Remember to set your ENV variables correctly:

```
export CVS_RSH=ssh
```

```
export CVSROOT=:ext:youraccount@cvs.sourceforge.net:/cvsroot/tikiwiki
```

For more information, see CvsForDevelopers.
