

PluginGI

PluginGI

```
{GI(lg=php)}echo $test;{GI}
```

GeSHi aims to be a simple but powerful highlighting script, with the following goals:

- * Support for a wide range of popular languages
- * Easy to add a new language for highlighting
- * Highly customisable output formats

PluginGI

```
*      (at your option) any later version.  
*
