Tiki Wiki CMS Groupware

The Open Source no-code/low-code web application framework for when a standard CMS isn't enough.

Web pages with any layout and style, edited like a wiki, combined with Tiki Trackers™ data input, management, and display functions, along with legacy CMS features and steady implementation of new technology such as Vue.js and Rubix ML.

The mission of the Tiki Software Community Association is to foster the development of the Open Source software, Tiki Wiki CMS Groupware, and to promote the free use of this software by all who can benefit....

New Developers Welcome
We make software the wiki way — no rigid hierarchy, and easy onboarding and commit access for new developers.

Experience Design Freedom with Tiki
Tiki Bootstrap-based themes are exclusively visual skins separate from site functionality, for a pure design environment. Tiki layouts are highly configurable via multiple configuration options and template customization.

Add to the Voices
From its inception, Tiki has been multilingual. We welcome translators as not all languages are fully supported yet, or just feel free to explore our i18n features.

Enjoying the Road Less Traveled
Over its history, Tiki has been downloaded more than a million times, but as a software product in the current market, Tiki is often overlooked. This means that, in contrast to shop-saturated market segments, there is opportunity for those offering support services.

Enterprise Support for Tiki

While Tiki is simple and standard enough to be installed, configured, and maintained with normal technical skills, assisted by the freely available documentation and user forums, more specific requirements might call for enterprise support. What are the current options and, for providers, the opportunities?

Tiki Likes to Collaborate

As an Open Source software project, we are strong believers in collaboration on as many levels as possible. Let us share our vision for working together with other associations, organizations, and projects.

How Tiki Stacks Up

We welcome Tiki appearing in software listings and marketplaces, as an option to meet web platform requirements.

Nonprofits Working Together for the Common Good

Tiki is an Open Source software project managed by the Tiki Software Community Association, a nonprofit organization registered in Ontario, Canada. We would appreciate any appropriate consideration by philanthropic and charity organizations, toward achieving common aims.
