UserPagemusus

Who is musus?

My name is Adam Shantz. I'm a senior music performance major in college/university at West_Virginia_Wesleyan_College, in West Virginia, USA. I live just outside Washington, DC, in Silver Spring, Maryland.

I also host the themes.tiki.org site. ✖

You can usually find me on IRC as *musus*. If I'm not on IRC, you can probably catch me via jabber as mususATjabberDOTorg.

Tikideas

This is a place for me to jot down ideas I have to help make Tikiwiki *better*.

* fix leftcol bug (done)
- fix middle col bug where content hides under the right col, or displays on top of it
- create a way for old wiki pages to automatically forward to the new page (db, maybe?)
- make it possible to edit titles of pre-defined modules
- replace duplicate images in wiki-editor quicklink area
- double clicking on scrollbar loads edit wiki page
- why placing the *page* tag inside *np* tags doesn't work
- why placing a bullet right after an up carrot (shift-6 on a qwerty keyboard) isn't parsed as a bullet (see the first bullet in this box)
- Wiki pages don't automatically link without the double parathesis if there isn't a second word detected (i.e. WAIroadmap)
- Make admin interface more intuitive & better organized
  - Reorganize admin section & rename "Admin..." in the various menus to read something like "Manage..." to avoid confusion.
- starting a wiki page with a number doesn't automatically create a link in a wiki page (see 508ThemeDev above)
- when forcing wiki linkage by using double parenthesis, it breaks the link, automatically defaulting to "TikiWiki" (again, see links above)
- implement a more intuitive means of creating a new wiki page
