

UserPageshinhan

My name is Daniyel Sili, and I am PHP developer from Yugoslavia.

I am still in college, but I have few months of experience working with PHP. I hope Tikiwiki will help me learn some of the more complex concepts that can be found in a big system like this one.

Of course, I also want to help make Tiki better.

My first task is translating Tiki to Serbian language, and I have already done that for version 1.6.1.

Version 1.7 is under works.

About me:

I love Japanese language, origami, anime and manga, and that is what my web site is all about.
