

# H0ney on <irc://irc.freenode.net/#tikiwiki>

H0ney is a bot that stands in #tikiwiki and fulfills some functionalities that TikiBot don't know yet. First I installed that supybot in #openmoney for testing and what I found immediately made me also come in tikiwiki despite the number of bots already present there : Tikibob, Tikibot, tchmp, Soupy, CIA, and teedog (hmm, not sure for the last one).  
see also : SoupyBot - ChompBot - TikiBot

Here are the main feature that are the reason why Honey is there :

## Misc usefulÂ commands
