Company name

All-Inkl

Description

- I´am running Tiki with the All-Inkl PrivatPlus and All-Inkl Premium shared webhosting packets. Everything is fine, Tiki is running without problems.
- Their service is fantastic! You could call or email them 7 days a week and you will get an answer.
- You can talk with them about options (I my case the perl-script-running time) and they will change it if possible.
